
EXP-OE-01 — Maxwell's Demon: observer as entropic regulator
H(t) [bits]
$\Delta H = H_{eq} - \langle H_B \rangle = 0.1214$ bits
A — free (mean)
B — demon (mean)
$H_{eq} = 1.796$ bits
stasis_cos
stable plateau in both conditions ⇒ attractor geometry preserved (no collapse)
A — free
B — demon
D_{eff}
D_{eff} A (free)
D_{eff} B (demon)
cumul. interventions (B)
cumulative interventions
