
Trust bifurcation — two stable attractors in (trust, H) space
(a) Phase portrait — trust/entropy dynamics
Entropy $H(t)$
Trust τ
High-trust attractor
Low-trust attractor
trust bifurcation boundary
(b) Trust trajectories — dual attractor
Trust $\tau(t)$
Time (min)
high-trust attractor
low-trust attractor
governed run (theoretical)
spec_boot synthetic (observed)
bifurcation boundary
