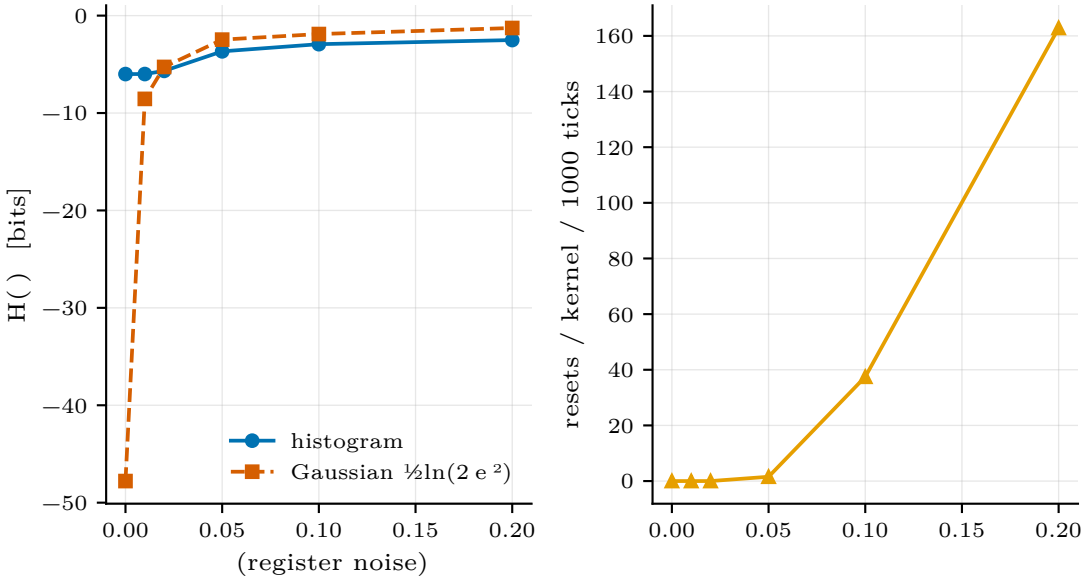
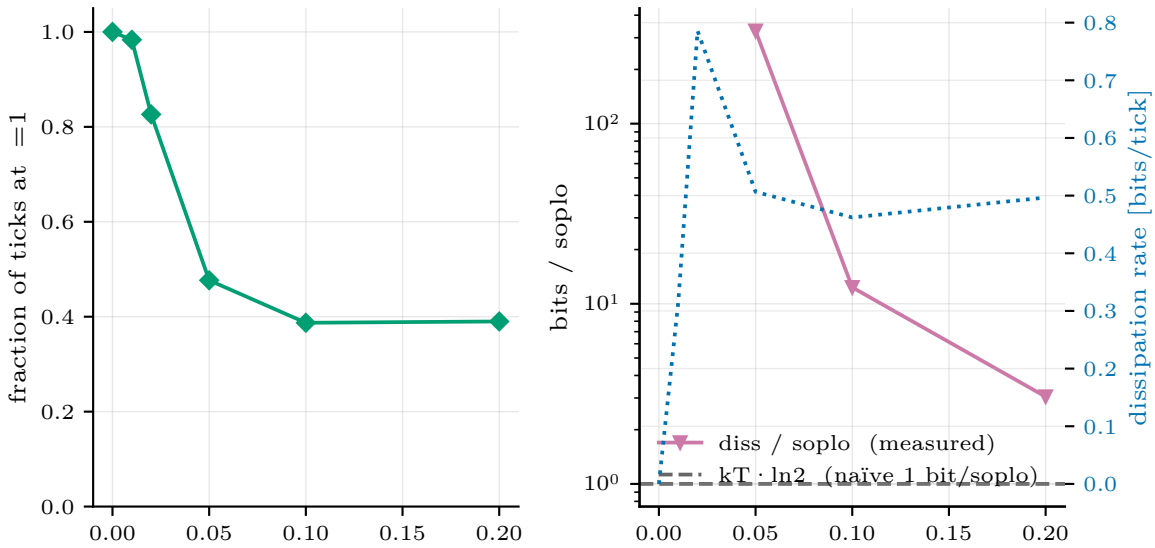
EXP-SOPLO-01 — Landauer cost of the trust-soplo: the reset is reversible (ΔH 0);
dissipation is an ensemble entropy-balance quantity, clamp+soplo jointly, kT · ln2/firing

P2 — register entropy ↑ with P4 — soplo frequency ↑ with (seed said 1/ — wrong sign)





F2 — clamp ceiling dominates erasure at low P5 — diss/soplo kT · ln2 (and ↓ with)
